Grade 10 November Exam 2026

Paper 1 (Physics) 2 hours

1. Mechanics
   - Distance and displacement
   - Speed and velocity
   - Acceleration
   - Graphs of motion
   - Equations of motion
   - Stopping distance
   - Mechanical Energy

2. Waves, sound and light
   - Transverse waves and pulses
   - Longitudinal waves
   - Sound – Pitch and Loudness
   - Reflection – echoes and ultrasound and Doppler Effect
   - Electromagnetic spectrum and photons

3. Electricity and magnetism
   - Magnetism
   - Electrostatics
   - Electric circuits
   - Current
   - Potential difference
   - Resistance
   - Components
   - Cost of household electricity
   - Combination circuits

Paper 2 (Chemistry) 2 hours

1. Matter and atomic properties
   - Atomic structure (Aufbau and Bohr diagrams, electronic configuration)
   - The periodic table
   - Names and formulae
   - Balancing equations
   - Chemical bonding (metallic, ionic and covalent)
   - Lewis diagrams, Couper diagrams
   - Ionisation energy and electronegativity

2. Chemical change
   - Mole calculations
   - Types of reaction (combination, decomposition, ion exchange and acid)
   - Reactivity series
   - Solubility rules
   - Electrolytes and conductivity

3. Matter and materials (to be confirmed)
   - Phases of matter and intermolecular forces
   - boiling point trends
   - types of solids

4. Organic Chemistry
    - Naming of compounds

For both papers general scientific skills are also examined i.e. scientific method, graphing skills etc.
